Profile

Front-End Developer who builds real, functional web applications with a focus on performance, usability, and clean design.

Employment

Front-End Developer (Self-Employed)

Aug 2025 - Present

blessing Muthivhi, Pretoria

- Problem-solving, responsive UI, real-world applications, fast learner
- Designed and implemented responsive and user-friendly web interfaces using HTML, CSS, and JavaScript for clients in Pretoria.
- Optimized website performance and loading times to enhance user experience across different devices and browsers.
- Collaborated with clients to understand requirements and deliver custom front-end solutions for real-world business applications.

Freelance Front-end Developer

Apr 2025 - Present

Self-Employed

Built and deployed a salon website for a client (Sky Angels Beauty Salon), focused on responsive design and service presentation. Developed a house wallpaper installation business website to showcase services and improve online visibility. Created a chicken and egg selling website with product display and customer inquiry features. Built a service website for a construction company (Labza Co), highlighting services, credibility, and contact accessibility

Projects

Movie Search Web Application

Movie-Search – A responsive web app that lets users search movies via the OMDb API, view details, and manage a personalized watchlist. Built with HTML, CSS, and JavaScript, it features dynamic rendering, interactive UI, and client-side data storage.
